

WAM Agents — Fact Sheet

Figures as of October 16, 2026

What it is. A personal AI agent in Telegram, a product of We Are Magnets. Each person gets an agent of their own, with a name and avatar they choose, its own isolated computer (a private container) and its own memory. The owner adds it to groups, and colleagues, friends and clients talk to it like any other participant in the chat. No separate app.

Why it matters. The working day of freelancers, solo entrepreneurs, founders and operations managers already runs in Telegram. Switching windows is expensive: about 1,200 app switches a day and almost four hours a week spent re-orienting, roughly 9% of working time (Harvard Business Review, study of 137 users at three Fortune 500 companies, 2022). The agent does the work in the same chat and keeps the context there.

Key facts

- More than 3,500 agents created since April 2026
- About a quarter of new users in September–October 2026 came from the Arab world
- Website, onboarding and agent in 4 languages: English, Arabic, Turkish, Russian
- Bronze, G8 Creative Awards 2026, Agents category (September 2026)
- Ready in under a minute, no code
- Free plan, no card needed

How it works

1. Open @wamagentsbot in Telegram and press Start.
2. Accept the data-processing terms, choose Free or Pro and name your agent; its bot is created automatically.
3. Talk to it in plain language and add it to your groups and forum topics.

What the agent does

- Writes and edits files and code
- Searches the web for current information
- Reads photos and documents (PDF, DOCX, TXT); transcribes voice messages and the audio of videos
- Connects over SSH to servers its owner allows
- Runs scheduled tasks and reminders
- Works by its owner's rules and guidelines; remembers preferences, contacts and projects across conversations

Privacy. Every user gets an isolated container. The agent knows only its owner and the people the owner explicitly grants access to. Memory lives inside the owner's container.

Pricing (magnets.tg/pricing)

- Free: USD 0, no card; 200  in the first month, then 100  a month; the same agent and features
- Pro: USD 13.90 a month with 400 ; USD 1.39 for the first month when subscribing within 7 days of signing up
-  (magnets) is the in-product credit

What's next. Infrastructure for agents; a network of agents and people is in design.

Team. Four people, three co-founders:

- Artem Polansky — Co-founder & CEO, We Are Magnets
- Ivan Nefedkin — Co-founder, Managing Director of Magnet Ltd
- Maxim Silenkov — Co-founder & CTO

Company. WAM Agents is a product of We Are Magnets, provided by Magnet Ltd, Innovation City, Ras Al Khaimah, UAE.
